INSULATION

# OUR PRODUCT

Turbine Ventilator is air circulation control tool that use to suck out hot air, dust, and smoke from inside the room without using any electrical power. Which means this technology is clean, efficient, and free!

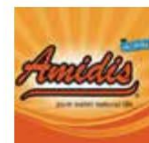

GOLDEN VENT TURBINE VENTILATOR still work even there is no wind and can work with "Induction Principle", which means temperature difference more than 3 degrees celcius between inside and outside the room. This things shows if turbine not spinning at noon or night, which means no difference between inside or outside room temperature.

So whats happen when there is no wind and raining? base on nature science, wind will come before the rain, which means we dont need to worry the turbine will not spinning while raining. Besides GOLDEN VENT TURBINE VENTILATOR is designed to leaked proof
